# Next Meeting

Our next meeting is on the 17<sup>th</sup> of April, when the subject for your images will obviously be Architecture. As shown today this does not have to be the whole building but can be parts or details. Plenty of scope both local and on your travels.

The first half will be a very short session with some tips on portraiture mainly about how to pose your subject and think about lighting. Then up to the break we will try out some portraits of each other. Weather permitting this could be outside or in, but the idea is to use natural light and not any additional lighting unless you want to bring a reflector.

**Please remember to bring your cameras or phones.**
