Our next meeting in June 19<sup>th</sup> at 2 p.m. for 2.15 start as usual.

The entire meeting will be taken up with before and after photos. This means we will not have a specific theme, but the idea is that you send in pairs of photos, the before image showing how it was taken and the after image showing the final version after editing.

We feel this will give everyone more of an opportunity to show what they actually do with an image and what software they use.

Obviously, this will take more time than our usual showing so that is why we will dedicate the whole meeting on this but can be on any subject which will give you more scope.

The topic of travel photography will be carried over to July.
