Next Month's meeting is July 17th

As a way of finishing off the season and hopefully already taking some of your ideas into account, we are having half the meeting on Travel photos as a follow up to Andy's presentation last month.

The second half will be a photoshoot here about water.

This means shooting things like flowers in water, water droplets, patterns of ink in water or fast shutter speeds of water being dripped into a bowl.

If anyone wishes to bring along props such as flowers, vases etc these would be most welcome.

So don't forget your cameras or phones next month.

August we will be taking a break with the new programme starting September.
